

Disaster Management & e-Health Working Group

Presented by Carmen Karam
on behalf of Sagarika Shyama

- Asia and the Pacific Region is routinely exposed to almost every type of hazards, mainly natural. There should be a considerable scope for reducing hazards and improving disaster management in the region.
- In this work group we are mainly focusing how we can improve the disaster management and e-health in the region as the joint effort.

**Some Topics Covered
in the Working Group**

1. Bring an awareness of the need for DM and available standards, technologies to the participants.
2. Brain storm on types of disasters, categorize them and how would IT requirement differ.
3. Promote DM solutions in respective countries of the participants.
4. Form a group skilled in DM solutions who can volunteer to deploy and train in the event of a disaster.

5. Identify other project areas that could collaborate with DM.
E.g. The live-e project
6. Efficient Disaster response system design proposal
7. Applicability of sensor network under disaster scenario.
8. Disaster preparedness and pre- disaster situation monitoring.

We are looking forward to your contribution, suggestions, ideas, projects and researches in this critical and important topic.

THANK YOU
